

Eyelanders is a Swedish, privately held, Independent, Quality assurance and Verification Company with over 14 years of experience.

We are specialised in stringent commodities verification, and inspection. We train Farmers and Cooperatives, thorough inspecting, monitoring, financial collateral management and auditing the different stages in the produce supply chain at origin. We verify (From farm to port quay and port to final destination).

Purchasing from origin without representatives or a comprehensive quality assurance procedure in place is risky and can be a tremendous liability for firms.

Our Staff is carefully selected having the expertise and experience of the commodity supply chain; they also speak the local languages and dialects of the region in which we work in.

Our foremost goal is to represent your interest from farm gate to port or from port to destination.
